Personal Projects

MebelCity
🌐 website github demo

- Developed a full stack eCommerce website for purchasing furniture using MERN stack (MongoDB, Express, React, Node)
- Implemented an admin panel for managing products and orders.
- Created a REST API using Express, and JWT authentication
- Integrated Stripe payment gateway to facilitate secure online transactions

FoodieConnect
github demo

- Incorporated Firebase services with a singleton design pattern into a Flutter application for seamless management of user authentication, cloud storage, and database functionalities.
- Utilized Google Maps and Google Places API to fetch nearby restaurants and display them on the map within the Flutter application
- Implemented factory design pattern for dynamic creation of markers and restaurants, enhancing scalability and maintainability of codebase
